New Feedback Request?

Hi guys! We recieved a request for feedback from Max Glass (sent to me directly but I think I should let everyone know about and address the question).

Max Glass's idea:

> Hi Charles, I'm Max Glass, an entrepreneur in real estate and technology related to real estate. I have a lot of experience with complex land transactions and I've been licensing geospatial datasets to startups and Fortune 500. I'm thoroughly down the crypto rabbit hole and want to **build an open source public records protocol for land, which maintains geospatial information about parcel boundaries, and other attributes.**

Max Glass sent me a message a!ter reading our Medium article on the [Peer Prediction Mechanism](#).

You can find his proposed protocol [here](#).

New people in Slack

We have some new people in the Slack Workspace!

Please welcome Alexandra Stabile (@Al), Ryan F. (@Ryan), and Ethan Ragins (@Ethan Ragins) to the Slack Workspace. Let's have some fun together discussing, ideating, studying, investigating and collaborating on the digital society and how to transition towards a global technological commonwealth.

Onboarding/Trial Period

I have been working on the Trial Period Syllabus, a document and course summarizing the onboarding process during the trial period.

The Syllabus covers:

1. Creating accounts
2. Learning Formats
3. Co-operatives and Platform ecosystems
4. Think tanks and thinking modals
5. Self-organization, self-management, personal growth and organizing models
6. Counter/Alternative-movements, actors and technologies
7. Research
8. Capstone Project

I think the document (at Version 0.3) is good enough but I am unsure whether it is too long or requires too much background information to complete.

You can find the document here.

Concerning the meeting to discuss the onboarding proces, you can find the Lettucemeet link to add your availability to your schedule.

Events

DCRC Events

Let me know what topical-based events (UBI, blockchain, data governance, coops, etc.) you guys want us to host or attend by sending me a message directly (@char) or in the #general channel.

@Ryan mentioned that he wants an event based on the pros and cons of various legal/business structures, including co-ops.

I (@char) am also thinking about hosting an event on NFTs and creative platform cooperatives, and seeking two speakers who understand the topics. My current thoughts are Austin Robey from Ampled for Platform Coops but I am unsure who I should pick for NFTs.

Community Events

IN3's DIMMONS research group is hosting [Sharing Cultures: 7th International Workshop on the Sharing Economy, Barcelona](#) on 02/24/2021.

It sounds like it will be super interesting!

Website updates

I will be adding my updates to the website on the [website's Github repository](#)via a fork.

Please review my updates and add your feedback (comments, concerns, etc.).

Public

Wiki

Questions

Charles's question:

1. If we are making a public wiki or directory, what should the wiki or directory cover?
